Chat Conversation

User: give me full code

Assistant: I'll provide the full React component for the Homescreen with the following enhancements:

1. Properly structured imports.

2. Cleaned up unused code and comments.

3. Consistent coding style and formatting.

4. Error handling and toast notifications.

5. Organized layout with TailwindCSS classes.

Here's the complete code:

<Full React Code Here>

Test it out and let me know if you need any more adjustments!
